Imperforates

Nearly all Hungarian stamps from No. 859 on were issued imperforate as well as with perforations. In most cases the imperforate quantities were smaller than the perforated ones. The imperforates were sold at five times face value, and all issued before Feb. 22, 1958, were invalid. Late in 1958, Philatelica Hungarica started selling the imperforates at four to six times face value.

Philatelica Hungarica announced in 1991 that, beginning with the 1992 issues, imperforates would no longer be produced.

**ARAD ISSUE**

The overprints on this issue have been extensively forged. Even the inexpensive values are difficult to find with genuine overprints. Values are for genuine overprints. Collectors should be aware that stamps sold "as is" are likely to be forgeries, and unexpertized collections should be assumed to consist of mostly forged stamps. Education plus working with knowledgeable dealers is mandatory in this collecting area. More valuable stamps should be expertized.
