(Tuva People's Republic)

**LOCATION** — Between Siberia and northwestern Mongolia at the sources of the Yenisei, in the basin formed by the Tannu-Ola and Sayan Mountains.

**GOVT.** — A former republic closely identified with Soviet Russia in Asia

**AREA** — 64,000 sq. mi. (approx.)

Russian, later Soviet, stamps were used in Tuva prior to 1926 and after 1944.

Nos. 122 and 123 were printed together in blocks of four, containing a vertical pair of the 25k and a vertical pair of the 50k, perforated internally both vertically and horizontally and imperf on the outer edges. Setenant pairs, Value \$225 (#122+123), \$275 (#122a+123a).

Nos. 121 and 123a were issued with gum, No. 123a both with and without gum, and the balance of the set without gum.

The re-engraved design of the satang stamps varies in numerous minute details from the 1912 issue. Four lines of the background appear between the vertical strokes of the "M" of "SIAM" in the 1912 issue and only three lines in the 1917 stamps.

The 1912 stamps with value in bahts are 3 1/2mm high; those of 1917 are 39mm. In the latter the king's features, especially the eyes and mouth, are more distinct and the uniform and decorations are more sharply defined.

The 1912 stamps have seven pearls between the earpieces of the crown. On the 1917 stamps there are nine pearls in the same place. Nos. 174 and 175 exist imperforate.
