

SAMOA

sā-'mō-ā

(Western Samoa)

LOCATION — Archipelago in the south Pacific Ocean, east of Fiji
GOVT. — Independent state; former territory mandated by New Zealand
AREA — 1,093 sq. mi.
POP. — 161,298 (1991)
CAPITAL — Apia

In 1861-99, Samoa was an independent kingdom under the influence of the US, to which the harbor of Pago Pago had been ceded, and that of Great Britain and Germany. In 1898 a disturbance arose, resulting in the withdrawal of Great Britain, and the partitioning of the islands between Germany and the US. Early in World War I the islands under German domination were occupied by New Zealand troops and in 1920 the League of Nations declared them a mandate to New Zealand. Western Samoa became independent Jan. 1, 1962.

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 191 in the regular postage section, Scott B1 in the semi-postal section and Scott C1 in the air post section.

Wmk. 355 — Kava Bowl and WS, Multiple

The 1p often has a period after "PENNY." The 2p was never placed in use since the Samoa Express service was discontinued late in 1881.

Imperforates of this issue are proofs. Sheets of the first issue were not perforated around the outer sides. All values except the 2p were printed in sheets of 10 (2x5). The 1p, 3p and 6p type I and the 1p type III were also printed in sheets of 20 (4x5), and six stamps on each of these sheets were perforated all around. These are the only varieties of the original stamps which have not one or two imperforate edges. The 2p was printed in sheets of 21 (3x7) and five stamps in the second row were perforated all around. The 2p was also reprinted in sheets of 40, which are much more common than the sheets of 21.

Reprints are of type IV and nearly always perforated on all sides. They have a spot of color at the edge of the panel below the "M." This spot is not on any originals except the 9p, the original of which may be distinguished by having a rough blind perf. 12. The 2p does show a spot of color. Forgeries exist.

GOVT. — Former British Crown Colony

AREA — 48,250 sq. mi. (approx.)

POP. — 1,954,300 (1997 est.)

The last ruling Raja, who retired in 1946 when he ceded Sarawak to the British Crown, was Sir Charles Vyner Brooke, an Englishman. He inherited the title from his father, Sir Charles Johnson Brooke, who in turn received it from his uncle, Sir James Brooke. The title of Raja was conferred on Sir James by Raja Muda Hassim after Sir James had aided him in subduing a rebellion. The title and right of succession were duly recognized by the Sultan of Brunei and by Great Britain. Sarawak joined the Federation of Malaysia in 1963.

Jedda Issues

Stamps of 1916-17 Overprinted

The control overprints on Nos. L51-L159 read: "Hukumat al Hejaziyeh, 5 Rabi af'awal 1343" (The Hejaz Government, October 4, 1924). This is the date of the accession of King Ali. Counterfeits exist of all Jedda overprints.

Jedda issues were also used in Medina and Yambo.

Used values for #L51-L186 and Lj17-Lj39 are for genuine cancels. Privately applied cancels exist for "Mekke" (Mecca, bilingual or all Arabic), Khartoum, Cairo, as well as for Jedda. Many private cancels have wrong dates, some as early as 1916. These are worth half the used values.

The printed surcharge (a) reads "The Hejaz Government, October 4, 1924." with new

denomination in third line. This surcharge alone was used for the first issue (Nos. L135a-L141a). The new denomination was so small and indistinct that its equivalent in larger characters was soon added by handstamp (b) at bottom of each stamp for the second issue (Nos. L135-L141).

The handstamped surcharge (b) is found double, inverted, etc. It is also known in dark violet.

The overprint in the tablets on Nos. L160-L185 reads: "5 Rabi al'awwal, 1343" (Oct. 5, 1924), the date of the accession of King Ali. The tablet overprints vary slightly in size. Each is found reading upward or downward and at either side of the stamp. These control overprints were first applied in Jedda by the government press.

They were later made from new plates by the stamp printer in Cairo. In the Jedda overprint, the bar over the "0" figure extends to the left.

Some values exist with 13mm or 15mm instead of 18mm between tablets. They sell for more. The lines of the Cairo overprinting are generally wider, but more lightly printed, usually appearing slightly grayish and the bar is at center right. The Cairo overprints are believed not to have been placed in use.

Imperforates exist. Nos. L160-L168 are known with the overprints spaced as on type D3 and aligned horizontally.

Copies of these stamps (perforated or imperforate) without the overprint, except No. L186 were not regularly issued and not available for postage.

No. L185 exists only with Cairo overprint. Imperfs of No. L185 sell for much less than No. L185. Fake perfs have been added to the imperfs.

The $\frac{1}{2}$ pi with blue overprint is bogus. No. L186 in other colors are color trials. For overprints see #58B-58D, Jordan 122-129.

NEJDI ADMINISTRATION OF HEJAZ

Handstamped in Blue, Red, Black or Violet

The overprint reads: "1343. Barid al Sultanat al Nejdia" (1925. Post of the Sultanate of Nejd).

The overprints on this and succeeding issues are handstamped and, as usual, are

found double, inverted, etc. These variations are scarce.

On the original stamps the knob-shaped Arabic letter, located under the two square dots in the middle of the top panel, has a small central dot. The dot often is missing.

On the redrawn stamps the dot has been enlarged into a conspicuous irregular oval. The 3p also has a period added after the value and the 4p has the "4" under the "T" instead of the "S." There are other small differences.

Jedda Issues

Nos. LJ1-LJ3 Overprinted in Red or Blue (Overprint reads up in illustration)

Jedda issues were also used in Medina and Yambo. Used values for #L51-L186 and LJ17-LJ39 are for genuine cancels. Privately applied cancels exist for "Mekke" (Mecca, bilingual or all Arabic), Khartoum, Cairo, as well as for Jeddah. Many private cancels have wrong dates, some as early as 1916. These are worth half the used values.

The "postage due" box was so small and indistinct that its equivalent in larger characters was added by boxed handstamp (b) at bottom of each stamp for the second issue (Nos. LJ26-LJ34).

The handstamped overprint (b) is found double, inverted, etc. It is also known in dark violet.

Only Nos. 17, 18, 20 and 21 exist in this new setting, which differs also in shades from the earlier setting. The narrow-spaced Nos. 17, 20 and 21 are rarer, especially unused, as are the early shades of Nos. 23 and 24. All values except Nos. 19 and 24 are known in various partly perforated varieties.
